

Chrysler performs a series of validation tests to ensure your phone will function properly in your vehicle. The results from this testing is listed below. For questions and additional help, call 1-877-855-8400.

Phone Compatibility

Uconnect Phone is a hands-free, voice-activated, in-vehicle communications system. It utilizes Bluetooth® technology to enable your mobile phone to connect to your vehicle without wires or a docking station, allowing you to use your phone through simple voice commands. Uconnect Phone supports many popular Bluetooth-enabled mobile phones. Performance can vary widely due to the wireless carrier, phone software level, and radio software level.

How to Use This Guide

Identify which radio you have, either by picture or by ID shown on the lower corner of the radio faceplate, then go to the appropriate bookmark.

Helpful hints!

Blackberry's:

Upon connecting (not pairing) you must select "don't ask again" check box and then select yes.

Blackberry Bold

Phone must be power cycled every night; otherwise BTSA will not be able to be controlled from the screen

IPhone's:

When trying to pair to Uconnect, if the Uconnect device is not visible on the phone, shut off the bluetooth and then turn it back on.

Droids:

When you pair the device you get a pop up asking if you would like to download the phone book, select the check box stating "always allow" and then select yes. Otherwise the phonebook and recent calls will never download.

EVO:

Don't plug in the phone through USB port in the car and set the Phone to USB mode. If you do your incoming calls with now show on the Uconnect system.

General Phones:

1. Phones with low battery may show improper behavior such as dropped connections.
2. If a phone does not support PBAP (Phone Book Access Profile) then the recent calls downloaded to the Uconnect system may not be in chronological order.
3. Your phone should be powered off every day in order for the Bluetooth features to function properly. If you experience connection issues between your phone and the Uconnect system you can try the following:
 - a. Turn your phone Bluetooth off then back on and try and reconnect the phone
 - b. Power your phone off and then on and try and reconnect the phone.
 - c. In some rare case you may have to reset your phone and then try and reconnect the phone.
 - i. Some phones require the battery to be pulled out and put back in to reset.

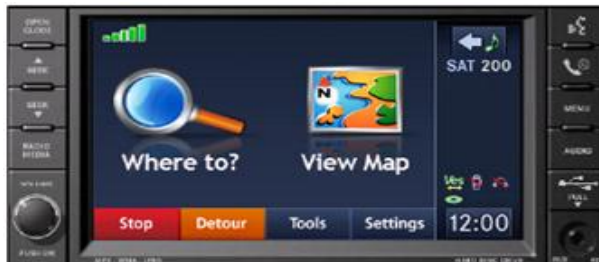

General Devices

ITouch's need to have 4.2 IOS loaded in order for the Blue Tooth Streaming Audio feature to function properly with your UConnect system.
