It is a place where engineering and beauty come together. It embodies a convergence of craftsmanship with technology and functionality with design. Built to entice with every drive in the most natural of manners, it represents a passion for ingenious engineering and stunning style. Engineered beautifully, this is a vehicle unlike any other.

THIS IS THE CHRYSLER ASPEN.
THE 2008 CHRYSLER ASPEN INCLUDES A LIFETIME POWERTRAIN LIMITED WARRANTY.

No deductible. See dealer for a copy of limited warranty and details.

Non-transferable. Not available on certain fleet vehicles.
Unmatched performance and elegant styling seamlessly blend in the Chrysler Aspen. The available 5.7-liter HEMI® V8 engine with Multi-Displacement System efficiently offers 335 horsepower and 370 lb-ft of torque. The available vent, tilt, and slide power sunroof offers a large opening overhead. Inside, it is the attention to detail and the upscale design cues, such as the sleekly designed door trim panels and interior LED lighting, which provides directional illumination, giving the cabin a more intimate feel without distracting the driver.
From its Madrona Burl accents and Satin Silver trim to its high-tech instrument panel, Aspen’s interior is nothing short of commanding. It begins by integrating CD and radio controls into Aspen’s steering wheel. There is also an available MyGIG® Multimedia Infotainment System* with Navigation that features touch-screen input, and vivid 2-D and 3-D bird’s-eye map views. Thanks to the 20GB hard drive on MyGIG, there is no lack of storage for your digital music files or photos. The available ParkView® Rear Back-Up Camera† helps detect objects behind you by displaying your intended path on the radio screen.

*MyGIG in-dash DVD capability is not available in all states. See your dealer for details.

†Always check entire surroundings before backing up.
Combine Aspen’s optional leather-trimmed seating with an Alpine® Premium Sound System, and you have a cabin that invites guests to simply sit back and relax. With the third-row 60/40 split-bench seat folded down, even your cargo will find itself in the most accommodating of environments. It takes little effort to heat or cool Aspen before you get inside. A remote start system is available, allowing the vehicle to start from up to 300 feet away when you press a button combination on your key.

Personalization is the key to comfort. With three rows of seating, Aspen can carry up to eight passengers in supreme comfort. The second and third rows easily fold to accommodate lengthy items, such as skis and bikes, to be carried with absolute ease. Equip Aspen with optional second-row bucket seating, and passengers can enjoy captain-chair comfort and heated cushions. Not only does Aspen provide more cargo room behind the second row of seats than any other vehicle in its class,* it features an interior that is in a class all its own.

*Based on 2007 Automotive News classification.
Properly secure all cargo.

With standard eight-passenger seating and plenty of storage space, there is room for both guests and cargo. When there is a big load to haul, simply fold all the seats down to reveal up to 102.4 cu ft of total cargo room. If any road trip leads to an unexpected mess, Aspen features YES Essentials® stain resistant, odor resistant, antistatic seat fabric.* Standard on Aspen cloth interiors, this Chrysler Group exclusive employs a dual-action technology that is woven into the fabric itself to repel and release stains without solvents. Spilled coffee, a child’s sticky fingers and muddy paw prints are no longer reasons to panic.

*Not compatible with aftermarket fabric-protecting coatings. Go to yesessentials.com for care details.
The available power liftgate can be remotely operated with the simple push of a button on the key. The optional Rear Seat Video™ System with a larger eight-inch screen plays audio CDs and MP3s or video DVDs. Important stats such as distance to empty, temperature reading, compass and maintenance intervals are digitally displayed on Aspen’s Electronic Vehicle Information Center (EVIC). All Aspen models also include a Tire Pressure Monitoring Warning Lamp and a Tire Pressure Monitoring Display in the EVIC. The standard rear temperature control will keep passengers comfortable during the ride. A 115-volt auxiliary two-pronged plug ensures that there is always plenty of available power for laptops and more.

MEANINGFUL FEATURES

A luxury vehicle is not doing its job well if it does not indulge you a little. With so many features available, Aspen simply requires that you enjoy the moment.

➤ MyGIG® Multimedia Entertainment System.* This available touch-screen system revolutionizes entertainment, information and communication through an AM/FM radio with a 20GB hard drive that stores playlists, JPEG images and more. It also rips, stashes, organizes and shuffles about 1,000 digital music files from CDs or via the integrated USB port and exterior input jack. A JPEG photo viewer lets you personalize the menu background, plus much more. ParkView® Rear Back-Up Camera† and ParkSense® Rear Park Assist System† come with every MyGIG system.

➤ MyGIG Multimedia Infotainment System* with Navigation. In addition to all the great features on the MyGIG Entertainment System, you will also get the added benefit of navigation.

➤ SIRIUS Satellite Radio‡. The standard SIRIUS Satellite Radio delivers over 130 channels, including 100% commercial-free music, sports, news, talk, entertainment, traffic and weather, all transmitted digitally via satellite. A complimentary one-year subscription is included when factory-installed. For more information, go to sirius.com.

➤ UConnect®. Do not allow yourself to be distracted by cell phone calls. UConnect is an available in-vehicle, hands-free, voice-activated communication system that allows you to talk through your Bluetooth® wireless phone while keeping both hands on the wheel.

*MyGIG in-dash DVD capability is not available in all states. See your dealer for details. †Always check entire surroundings before backing up. ‡“SIRIUS” and the SIRIUS dog logo are registered trademarks of SIRIUS Satellite Radio Inc. All other trademarks, service marks and logos are the property of their respective owners. All rights reserved. For full terms and conditions, visit sirius.com. Prices and programming are subject to change. Not available in AK and HI.
**PERFORMANCE**

It should come as no surprise that the vehicle with the most powerful engine in its class* has also earned honors for best-in-class* towing. When it comes to hauling, Aspen delivers with unrivaled confidence. Its Electronic Stability Program (ESP)† with Trailer Sway Control (TSC) helps stabilize the vehicle during extreme steering maneuvers. TSC helps bring the vehicle and trailer under control when “sway” is detected. Its smooth ride quality and steering response allows Aspen to provide comfort and maneuverability. As for suspension, 2WD and 4WD models share a common torsion bar independent front suspension that gives 2WD models the same ride height as 4WD models. The isolated torsion bar crossmember also reduces road noise. Aspen’s class-*unique link coil rear suspension and Watt’s linkage help improve ride quality.

> **Best-In-Class** Towing Maximum trailer towing capacity of 8,900 lb (4,037 kg) with the 2WD 5.7-liter HEMI® V8 engine with Multi-Displacement System (MDS) is best among mid-size SUVs. With 4WD, the maximum trailer towing capacity is 8,700 lb (3,946 kg).†

> **Maximum Payload** Aspen 4WD models have a maximum Gross Vehicle Weight Rating (GVWR) of 6,650 lb (3,016 kg). Select models provide a maximum payload up to 1,570 lb (712 kg).‡

*Based on 2007 Automotive News classification. When properly equipped. †No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESP warning lamp in the speedometer flashes, the driver needs to use less throttle and adapt speed and driving behavior to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt.‡ When properly equipped.

---

**POWER**

With best-in-class* horsepower and torque, you will discover Aspen is one able-bodied SUV. Choose from two powerful V8 engines.

> **4.7-liter Flex Fuel V8 Engine.** Packing plenty of muscle while helping the environment, this engine has 303 horsepower with 330 lb-ft of torque, providing 17 hwy mpg† (with 2WD) and 17 hwy mpg† (with 4WD). Tank can be filled with E85 Ethanol, regular gasoline or a mix of both.

> **5.7-liter HEMI V8 Engine with Multi-Displacement System (MDS).** With unmatched capability and performance, the 5.7-liter HEMI V8 engine out powers all competitive models with best-in-class* 335 horsepower and 370 lb-ft of torque. Fuel economy is 19 hwy mpg† (with 2WD) and 18 hwy mpg† (with 4WD).

> **Multi-Displacement System (MDS).** The 5.7-liter HEMI V8 with MDS increases fuel economy† by using advanced computer technology to automatically turn the HEMI V8 into a four-cylinder by deactivating selected cylinders in each bank at cruising speeds. When full power is needed, it seamlessly transitions back to a V8 in 40 milliseconds.

*Based on 2007 Automotive News classification. When properly equipped. †EPA est. mpg. ‡13 city to 19 highway, EPA est. mpg with MDS. Results depend on driving habits and conditions.
Fully equipped to cruise right out of the box, Chrysler Aspen knows how to make an impression. Even when you see Aspen for the first time, there is no doubt that it is a Chrysler. From front to rear, Aspen is bold and distinctive. Broad grille. Sculpted hood. Chrome accents. Combine its unmistakable street presence with well-poised handling and remarkably innovative features, and you have more than a handsome face. You have the Chrysler Aspen — an SUV that is sure to influence the future of SUV design. This is engineered beautifully.
SAFETY AND SECURITY

When it comes to your safety, Chrysler Aspen has the protective instincts of a bodyguard. With its front frame rail tips and the surrounding protection of its safety cage construction, Aspen also includes some of the most advanced technology available to help protect its most precious cargo — you and your passengers.

➤ All models include advanced multistage driver and front-passenger air bags.* Within split seconds, Aspen makes immediate adjustments to its air bag deployment, inflating with a force that is appropriate to the severity of the impact.

➤ Side-Occupant Protection System. This standard feature includes supplemental side-curtain air bags* that extend to all three rows of seats. It also uses a roll detection system that deploys in certain rollover scenarios and side-impact events, utilizing multiple sensors to determine the severity of the impact.

*Always sit properly in the seat with the seat belt fastened. Children 12 and under should always be in a backseat, correctly using an infant or child restraint system or the seat belt positioned correctly for the child’s age and weight.

➤ ParkView® Rear Back-Up Camera.* Thanks to an available camera mounted on Aspen’s liftgate and a 6.5-inch diagonal screen on your radio, you’ll have a better visual of objects while driving in reverse.

➤ ParkSense® Rear Park Assist System.* Available ParkSense uses audio and visual warnings to assist drivers during reverse parking maneuvers to avoid colliding with most large stationary objects.

➤ SecureShield® laminated side-window glass is made of material similar to that of the vehicle’s windshield and therefore can break, but not shatter. This deters theft intrusion and contributes to cabin noise reduction.

➤ Electronic Stability Program® (ESP). All the features that comprise ESP — Brake Assist, all-speed traction control, Electronic Roll Mitigation (ERM), and Trailer Sway Control (TSC) — constantly monitor the driver’s input against the vehicle’s actual course and, if needed, attempt to correct the vehicle’s course by automatically applying the brake and/or reducing engine torque. Meanwhile, the ERM system estimates the potential for wheel lift. If necessary, the engine power is reduced and appropriate braking is applied to help stabilize the vehicle.

*Always check entire surroundings before backing up. ’’No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESP warning lamp in the speedometer flashes, the driver needs to use less throttle and adapt speed and driving behavior to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt.
